Prostoria / Innovation as Social Responsibility

MAROJE MRDULJAŠ

We tend to perceive furniture as something abstract, created on designers' desks and then produced, branded and placed on the market by companies with different statuses and reputations. In fact, relations inside the contemporary globalized furniture industry are becoming more and more fragmented with less and less opportunity for complete dedication to synergies and collaborations... Prostoria, as a company whose catalogue already comprises some new icons such as the Polygon armchair and the Revolve transformable sofa, stands as an example of a different and more traditional approach based on the evolution from the local givenness and logical clustering of all actors involved in the production process.

Rapid development of Prostoria, a company which has come a long way, from 'starting from zero' to positioning itself as the leader and promoter of new ideas in only a few years time, is a story about the reintroduction of continuity both in Croatia and Central Europe, a region with vital but insufficiently recognized design scene and remarkable tradition and knowledge of the furniture industry. Those elements served as latent potentials that provided grounds for continuation and had to be activated.

Since the beginning, Prostoria has been developing an integrative approach, functioning as a collaboration platform that nourishes and stimulates continuous exchange of knowledge and experience between all the actors participating in the production of furniture. A dynamic workshop ambience has been created offering opportunities mainly to young designers to explore their ideas in excellent conditions and bring them to the highest level of design, functionality and technological artisanship. Many products have been developed over longer periods of time surpassing a number of iterations until reaching their final form, which would be impossible without the adequate support combining the contemporary technology and meticulous craftsmanship and handwork of the highest quality. Predominantly local materials are used, especially solid wood, and most of the production takes place within the company itself.

While the company's catalogue also offers furniture based on already proven models, Prostoria shows strategic and even passionate dedication to research-based design, convinced that authenticity has its place on the market but presents a special challenge in the times when it seems almost impossible to create truly innovative and fresh concepts.

For that reason, Prostoria's social responsibility and specific position have to be observed as a contribution to the evolution of design and readiness to take the risk in order to reach new values for the benefit of users and the culture. Thus, Prostoria stands as a distinct project inside of which designers grow together with the company on the grounds of mutual trust and shared goals.

General terms & Conditions

All of our products are produced in line with our business philosophy of creating quality furniture that will enrich you everyday life. Each of our product's form is an extension of its function, and we consider aesthetics to be a basic human need. We research, design and develop products by combining the latest technology and materials, in order to create a quality product.

Our warranty is valid for 2 years for constructions, upholstery and cushion covers. The warranty is effective from the date of purchase and covers all manufacturing defects and is valid only upon the presentation of the certificate of origin and invoice.

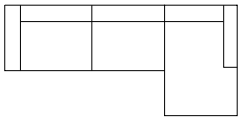
The warranty covers repair or replacement of any unusable or defective parts without compensation for the duration of the warranty period and after the report and acceptance of the complaint by Prostoria.

The warranty excludes damage caused by careless or incorrect assembly of the product, possible damage resulting from an accident such as a falling, shock, natural disaster, fire and in any other case where the defect cannot be attributed to the manufacture of the product. In addition, the warranty does not apply if the product has been disassembled, modified or repaired by anyone other than a person authorised by Prostoria. Damage caused by improper maintenance or misuse shall not be considered a defect in the design of the product.

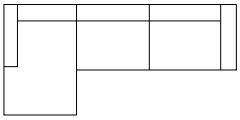
Keep in Mind when making your Choice

When choosing a sofa, first decide about its size and shape.
Keep in mind the frontal viewing when choosing the corner sofa.

EXAMPLE 1 – MATCH XL 103 1SEATER+ARMREST/L + 1SEATER + CHAISE LONGUE/R
(chaise longue on the right side, seen frontally)



EXAMPLE 2 – MATCH XL 103 CHAISE LONGUE/L + 1SEATER + 1SEATER+ARMREST/R
(chaise longue on the left side, seen frontally)



Your order must contain all the necessary product's specifications characteristic for each item: the fabrics/leather colour code, the type and colour of legs and colour of the wood armrest.

EXAMPLE 3 – ELEGANCE 3SEATER 166 HALLINGDAL 65 500, METAL LEGS BLACK

TYPE AND COLOUR OF LEGS HAS TO BE SPECIFIED IN THE ADDITIONAL PRODUCT DESCRIPTION

EXAMPLE 4 – OBLIQUE EASY CHAIR OAK LIGHT / 166 HALLINGDAL 65 500

EXAMPLE 5 – POLYGON EASY CHAIR BLACK / OAK NATURE / 166 HALLINGDAL 65 500

REMARKS:

COF - CUSTOMER OWN FABRIC

- the price indicated in the Price List refers to fabrics without any patterns
- all orders submited in COF need to be approved by the manufacturer based on the delivered sample, min. size 15 × 20 cm
- in case of the fabrics with patterns it is necessary to submit a min. 1 ml sample, in order to make an estimation of consumption of the fabric and additional work that will determine the price
- Prostoria is not responsible for any claims related to the fabric quality
- the fabric needs to be delivered min. 15 days prior to the dispatch date

COL - CUSTOMER OWN LEATHER

- possibility of using leather selected by the customer is available solely with prior submission of a sample, the sample size is approx. 20 × 30 cm
- leather consumption depends on the leather quality; natural or prefabrication flaws might lead to increase of requiered quantities
- Prostoria is not responsible for any claims related to the leather quality
- leather needs to be delivered min. 15 days prior to the dispatch date

Materials & Maintenance

To maintain the quality and durability of your product for as long as possible, you should follow these basic and simple guidelines:

- avoid placing the product near a source of heat and exposing it to direct sunlight as this may cause alternations in the tone and affect the hardness of the product.
- when moving the product, be careful not to drag it on the floor as such action may result in damage both to the product and the floor
- perform regular checks of the condition of the sliders as it may result in damage of the product and the floor; you can purchase additional or new sliders (plastic or felt) at the nearest salon or at the dealer where you purchased the product
- for stackable products, check the condition of the safety components; if they fall out, the products may be damaged, and you should contact the nearest salon or the dealer where you've purchased the product
- chairs and easy chairs should be stacked carefully and according to the listed stacking number to avoid any possibility of damage
- for tables and coffee tables, avoid partial covering of the surface as this may cause discoloration of the surface
- for surfaces used for shelving, be careful not to damage the surface with sharp or damp objects
- suitably protect and store products for outdoor use over winter or against adverse conditions; we recommend storing those products in a dry and airy place or using protective covers
- avoid improper use of the product, such as sitting on a backrest or armrest, or swinging or standing on a chair
- avoid placing greasy, wet, hot or cold objects directly on the solid wood surfaces, as they may leave a permanent trace

PRODUCT CONSTRUCTIONS

The inner construction of our furniture is made of panel materials (plywood) and/or metal elements, which provide the basic shape of the product. Seat and backrest supports (wave springs, elastic bands, goodside® slats), together with the foam (HR foam, polyurethane foam), make our furniture comfortable and durable.

Foams are high quality polymer materials with high elasticity and resistancy to permanent deformation. HR foam is produced by cold process based on water and does not contain any harmful chemicals. It has excellent hygienic and antiallergic properties. Polyurethane foam is made of recyclable material. We use cold and polyurethane foams of a wide range of density and hardness to provide a wide selection in obtaining the desired comfort. Moulded polyurethane foam is used in products of specific shape - the construction is soaked in foam which takes the form of a mould into which it is poured. Due to expansion, this process results in the final form ready for upholstering.

Metal parts are made of the highest quality aluminium, carbon steel and stainless steel suitable for outdoor use by the sea.

The fabrics and the leathers in our collection originate from the workshops of the most famous and renown European manufacturers.

We approach the wood as a natural resource with great respect and responsibility. The raw material we use the most is solid wood, especially Slavonian oak. In order to promote sustainable development and environmental protection, we are part of the Slavonian Oak Cluster. We have also introduced the FSC-STD-40-004 V3-0 Certificate to guarantee the sustainable development of forest management. The ISO 14001: 2015 standard sets out requirements for the environmental management system, including the planning, establishment, implementation and monitoring of the environmental management system.

Materials & Maintenance

solid wood & plywood

Natural imperfections of wood, such as variations in colour and texture, knots and tree rings, are not considered faults and undesirable characteristics but rather values of the natural material used. Our wood is treated with oil or lacquer in such a way that the material appears as naturally as possible, emphasising the appearance of an open tree ring. Colour lacquer does not completely fill the pores of wood to highlight the natural quality of the material, and tree rings remain visible. There are no visible tree rings in lacquered plywood. Oil and lacquer on all wooden surfaces always give matte effect, which is Prostoria's visual standard for the processing and protection of the wood. We highly recommend lacquer as a wood finish for our product used in contract projects, public and more frequent spaces.
Outdoor wood, especially teak, has an even more pronounced change in the tone and intensity of visible tree rings over time, which is not considered as a flaw but a natural quality and refinement of the product.

Wipe the surface regularly with a clean and dry cloth. If the surface of the product is dirty, you can wipe it using a well-drained cloth soaked in water or a light neutral soap. Remove any soapy residue immediately.If the surface is slightly damaged or appears matt, we recommend our wood surface maintenance kit. Avoid products containing acetone, diluents, ammonia, abrasive detergents or furniture wax. avoid placing greasy, wet, hot or cold objects directly on the solid wood surfaces, as they may leave a permanent trace.

NOTE

COLOURS SHOWN HERE ARE APPROXIMATE AND INFORMATIONAL. NUANCES VARY ACCORDING TO VARIOUS QUALITIES OF DIFFERENT MATERIALS, DUE TO THEIR DISTINCT TEXTURES AND ABSORPTION CAPACITIES. TO GET AN ACCURATE INFORMATION ON COLOURS IT IS NECESSARY TO CONSULT THE PHYSICAL SAMPLES.

Materials & Maintenance

table tops

Fenix NTM is a table top finish in the form of a thin laminate that is pressed to the bottom and top of the mdf. The sides of the mdf are lacquered. Fenix is a durable material that does not show fingerprints. It can be cleaned using a damp soft cloth soaked in warm water or a solution of water and mild detergent. We recommend the use of the Fenix maintenance kit (contact your nearest salon or the dealer where you purchased the product). Damages such as scratches that are not cut in can be treated thermally using an iron and a damp cloth.

TRESPA HPL

Trespa Meteon outdoor table tops have a compressed surface, virtually pore-free, making them impervious to contamination. This is why Trespa Meteon® is highly resistant to most chemicals, including many non-aggressive and aggressive cleaning agents.
Do not use abrasive or polishing cleaners. Use only clean sponges and soft cloths. Algae and mould will not penetrate the pores of the material so they are easy to clean just like dust, stains or fingerprints. You can wash them off using a universal household cleaner. Rinse and wipe the board using a soft cloth to avoid any traces remaining after washing.

PARSOL BRONZE

Materials & Maintenance

table tops

Compact boards are high-pressure thermoset laminates (HPL) obtained by pressing under high pressure and high temperature. Refined with decor on both sides, this multi-layer material is at the same time extremely resistant and long-lasting as well as easy to maintain. It also provides high resistance to scratches, wear, solvents, chemicals, moisture and heat. The surface of Compact boards is extremely resistant to dirt, but if necessary it can be treated with standard non-abrasive cleaners.

COMPACT BOARDS

COMPACT BLACK

COMPACT WHITE

Materials & Maintenance

metal

All powder coated metal products and elements have a matte finish, which is Prostoria's visual standard used in the processing and protection of metallic materials. Hand-welded metal parts may have minor imperfections that do not affect the quality or function of the product, but are a reflection of the manual work of our craftsmen. Metal products intended for outdoor use have a double finish - a primer for better mechanical resistance and a coloured coating for protection against corrosion.
To clean powder coated metal products use a damp soft cloth soaked in a solution of water and a pH neutral detergent, and wipe using a clean, dry and soft cloth.

Materials & Maintenance

upholstery & cushions

Suede and other types of leather may have scars and wrinkles, or minor changes in tone or imperfections that are not considered faults but an anomaly that confirms the natural quality of the material. As such, they are considered a positive feature of the product. It is the responsibility of Prostoria to position such anomalies on less visible parts of the product when tailoring the material.

Some types of fabrics have certain properties due to finishing, such as tufting, dots or other effects on fabrics, etching of velvet, or production methods that are not considered as flaws. For fabrics, suede and other types of leather, each production lot may indicate a slight difference in colour in comparison with the pattern or a product manufactured at an earlier time. To properly maintain the leather and fabrics, visit the manufacturer's website or *media.prostoria.eu* and follow the instructions.

Products made with leather or fabric should not be exposed to direct light and positioned at least 1 meter away from the source of the heat, as those factors may contribute to discoloration or drying of the leather, which can cause cracks.

Upholstered sofas should be vacuumed regularly using a suitable extension and ventilated to prevent deterioration and impurities. Due to use, the fabric will eventually need to be straightened and seams adjusted manually. The folds can be straightened using steam. In case of spillage, remove the liquid immediately by tapping with absorbent paper or cloth. Do not rub the stain!

The velour covers should also be regularly vacuumed or wiped with a cloth, always following the direction of the thread. Aniline leather has no or very light surface protection and, by its nature, gains patina and traces of use over time. Semi-aniline leather has a lightweight surface protection so these furniture sets can be vacuumed and stains cleaned using a damp cloth soaked in the water, a light neutral soap, or a specialized leather care agent. Remove soap marks immediately using a dry, soft, cotton cloth. Be careful not to let too much water soak into the pores. Always remove stains moving from the edge towards the centre of the stain, so as not to expand the affected area. Avoid concentrated detergents or agents containing bleach, ammonia, or products used for cleaning and protecting of clothing and shoes.

The Outdoor textiles are water-repellent and fast drying. They are resistant to negative environmental impacts and damage caused by sun, seawater and chlorine. To find out more about the properties and methods of care and maintenance of the Outdoor textile, visit the website linked below.

Cushions can be filled with 100% feathers and down mixture, or with 100% polyester fibre filling. In order for the cushions to look good and provide comfort for as long as possible, they need to be regularly aerated and their filling shaken, which will allow them to return to their original shape. We recommend rotating the cushions (top-bottom and front-back sides) so that they are equally used on all sides. Cushions filled with feathers have a 100% goose feathers and down filling, without chemical treatment. They should be shaken and tapped regularly to redistribute the filling and reduce the effect of flattening.

3angle

DESIGN: GRUPA, 2012

3angle collection consists of a sofa, an armchair and a pouf. They will completely change your perspective on sofas starting from the ergonomic shape of the armrests folded in the middle, which imitate the line of a human hand in the sitting position. The accentuated crystal form of 3angle is softened with comfortable padding, creating a perfect combination of a character form and softness necessary for siting comfort. 3angle is an excellent choice for your business lounges, and at the same time a true refuge for informal and relaxed sitting.

STRUCTURE	solid wood, plywood

Absent XS

modular sofa

DESIGN: NUMEN / FOR USE, 2023

The already well-known and beloved **Absent** got a younger brother, the **XS** module, which makes it more suitable to smaller places. The module is 15 cm smaller in width, and 8 cm smaller in depth. The comfort, which is the very important quality of Absent, has not been compromised in any way.

We also added an interestingly modelled armrest that can be mounted to any module on one side or both sides of it. The same armrest is also suitable for regular Absent modules.

STRUCTURE	plywood, metal
SUSPENSION	GOODSIDE® slats
SEAT & BACKREST	HR foam, polyester wadding
BASE	solid wood + BLACK lacquer / teak + outdoor oil

ARMREST	solid wood + oil, lacquer or BLACK lacquer / teak + outdoor oil
UPHOLSTERY	fabric (removable)
DECORATIVE CUSHIONS	HR foam, feather

MANDATORY TO SPECIFY

- **modules specification and dimensions**
- **finishing for armrest** *i.e. OAK NATURE*
- **upholstery** *i.e. ARCO JADE 400*

Avet

low tables

DESIGN: NUMEN/FOR USE, 2020

The design of **Avet** low table relies on the light triangular metal construction, whose skeletal lines endow it with certain fragility and weightlessness. With the addition of toned glass surface, the table becomes almost dematerialized, an elegant, shadowy silhouette.

TABLE TOP	smoked glass (PARSOL GREY)

Bavul

bench & bed

DESIGN: LEA AVIANI, 2020

Bavul is a multifunctional upholstered object that transforms from a bench to a bed. Its shape and a name are a reminiscence of a Dalmatian antique chest that was used for storage, seating or travel, and it was handed over as a legacy inside the family. Bavul in its basic form serves as a seating system in a living room, dining room at a table, or in a hallway – waiting to welcome your needs for the additional bed. Its dimensions are also perfect match for the hospitality projects where it saves the precious space. With strong visual appearance and color combinations, Bavul blends in various interior styles.

STRUCTURE	plywood
SEAT	HR foam, polyester wadding

Bik

chairs & barstool

DESIGN: NUMEN/FOR USE, 2018

Bik is the chair reduced to its basic elements; four legs, seat and a backrest. A barely visible decrease of width of the legs, frontward inclination of the back legs and slightly overstated curvature of the backrest define the character of this otherwise archetypal chair. Wider back legs are slightly detached aside enabling easy stacking when chairs are not in use. The structure is made of solid wood and the seat and the backrest of molded plywood.

BASE	solid wood + lacquer or colour lacquer
BACKREST	plywood, veneer + lacquer or colour lacquer
SEAT	plywood, veneer + lacquer or colour lacquer / plywood + upholstered seat
UPHOLSTERY	fabric

MANDATORY TO SPECIFY

- **short or long backrest** *i.e. short backrest*
- **type and finish or colour of the wood** *i.e. RED*
- **upholstery, when specified** *i.e. ARCO JADE 400*

Buffa

armchair

DESIGN: NUMEN / FOR USE, 2024

A puffy, distended shape that suggests immediate comfort, together with spiked edges to further emphasize the inner plumpness. **Buffa**, even the name sounds pliable and absorbent, like a silencer. Its connection to Italian comic opera comes only secondary - through a certain playfulness and flippancy of form.
Formally, this was about abandoning a classic sleek and angular style, and making a distinct shift towards the soft, rounded line to create an armchair and a sofa that do not need to be tamed or appeased with cushions.

BASE	steel construction + powder coating BLACK
SEAT & BACKREST	plywood + steel, HR foam, polyester wadding
ARMRESTS	steel construction + powder coating BLACK + solid wood + lacquer nature or BLACK
UPHOLSTERY SEAT & BACKREST	fabric (non-removable)

NOTES

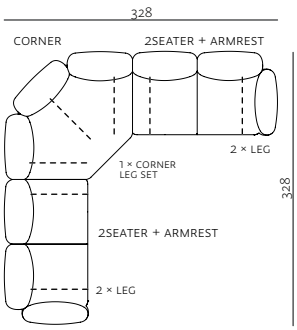
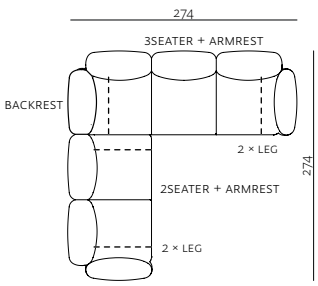
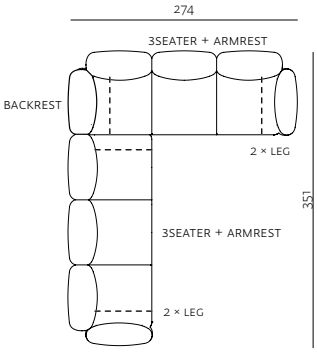
- CONFIGURATION (MODULE) SHOULD END EITHER WITH BACKREST OR WITH ARMREST
- IF NEITHER BACKREST NOR ARMREST IS USED TO FINISH THE CONFIGURATION (MODULE), IT SHOULD BE STATED IN THE ORDER
- LEGS ARE AVAILABLE IN OAK OR WALNUT

EXAMPLES OF CORNER CONFIGURATIONS WHERE A BACKREST IS ADDED INSTEAD OF AN ARMREST:







Classic

modular sofa

83/103

DESIGN: PROSTORIA DESIGN TEAM, 2012

Classic collection is unintrusive but its prototypical conception and formal rigidness give it a universal reliable character. It is precisely this universality that allows the soundness of the design and the quality of the materials to speak for themselves. The variety of modules and variations in their width have contributed to the popularity of the set, making it equally suitable for both public and residential spaces.

STRUCTURE	solid wood, plywood
SUSPENSION	wave springs
SEAT & BACKREST	HR foam, polyester wadding

BASE	PVC
UPHOLSTERY	fabric / leather (removable)

MANDATORY TO SPECIFY

- **modules specification and dimensions**
- **upholstery** *i.e. ARCO JADE 400*

Cloud

modular sofa

DESIGN: SANJA KNEZOVIĆ, 2012

Cloud comes from a family of modular sofas, offering a large number of compositions, each adapted to a given space. Its morphology is defined by simple basic lines of a slightly lower armchair and an elevated armrest. The support made of cold foam reinforces its entire volume, while the feather-filled top provides extra softness and a sensation of relaxing 'on the clouds'. In combination with natural fabrics, the experience of relaxation and pleasure reached the maximum point.

STRUCTURE	solid wood, plywood
SUSPENSION	GOODSIDE® slats
SEAT & BACKREST	HR foam, polyester wadding, feather

BASE	PVC
UPHOLSTERY	fabric / leather (removable)

w - width / d - depth / h - height

All prices are in EUR

NOTE

- SOLO* IS A STAND-ALONE MODULE
- THE ACTUAL DIMENSIONS OF THE CORNER ELEMENT ARE 106 × 106 CM, AND IN ORDER TO CREATE A CLEARER DRAFT OF THE CORNER ICONS, THE CORNER ELEMENT WAS DRAWN IN DIMENSIONS 112 × 112 CM. FOR THAT REASON, THE OVERALL DIMENSION OF THE DRAFT COMPOSITION AND THE COMPOSITION OF THE ACTUAL ELEMENT WILL DIFFER BY 6 CM.
- THE ACTUAL DIMENSIONS OF THE ASYMMETRIC ANGLE ARE 137 × 112 CM, AND THESE DIMENSIONS WERE USED TO DRAW THE ICON, HOWEVER, 6 CM IS LOST WHEN CONNECTING OTHER ELEMENTS ON THE NARROWER SIDE OF THE ASYMMETRIC ANGLE.

Combine

modular sofa

DESIGN: NUMEN/FOR USE, 2015 (NEW MODULES 2020)

Combine is a seating system of reduced form characterized by the profile of the lower side of the backrest. Depending on the choice of wooden legs finish and optional cushions, the style and the application context of Combine varies, enabling the user to define his or hers own preferred character of the sofa. The sophistication of the Combine sofa is now further highlighted by the thin metal legs.

STRUCTURE	metal, plywood
SUSPENSION	elastic webbing
SEAT CUSHION	HR foam, polyester wadding, feather
BACKREST	HR foam, polyester wadding

Convert
modular sofa

INDOOR & OUTDOOR

DESIGN: SMPDO, 2016

Convert is a modular seating system providing various combinations of arranging compositions in space. Its structure is flexible and can be modified over time. By changing positions of the seating modules, fixed backrests or the ones with a mechanism and a platform for storage, a variety of different possibilities applicable to both residential and public spaces. Due to its discreet design, through the disposition of structural elements, selection of materials and several types of cushions, the system changes its character and function depending on the user's preference.

The only difference on the **Convert Outdoor** modular sofa is the base that prevents slipping on gravel or sandy terrain. The Convert Outdoor shelves are available in several variations of Trespa material and solid teak wood.

STRUCTURE	plywood
SUSPENSION	elastic webbing
SEAT & BACKREST	HR foam, polyester wadding
BASE	metal + powder coating / inox legs + powder coating metal construction galvanised + powder coating

UPHOLSTERY	fabric / leather (removable) waterproof fabric (removable)
SIDEBOARD	solid wood + oil or lacquer / outdoor HPL, solid wood slats + outdoor lacquer
DECORATIVE CUSHIONS	feather

INSTRUCTIONS FOR USING THE PRICE LIST:

Convert is a modular system offering numerous possibilities of combining components. To provide an easy-to-use Price List, we have defined the most frequent basic and characteristic compositions by the description and price that can be used for a quicker calculation of the price.
In case you need a price of the composition which compared to the one shown differs only in one element, deduct its unit price from the composition and add the price of the element that you need.
When combining the components, use the typology for a better insight in the required dimensions of the structure and elements.

MANDATORY TO SPECIFY

- **number of the composition or modules specification and dimensions**
- **metal finishing** *i.e. BLACK*
- **sideboard** *i.e. OAK nature*
- **upholstery** *i.e. ARCO JADE 400*
- **sketch of the configuration**

Dobra

chair

DESIGN: NUMEN/FOR USE, 2016

Dobra is based on the traditional typology of a wooden chair with an upholstered seat. The chair's character is defined by a double, symmetrically placed leg cones. On the cone's joint, the axis changes the angle in order to meet the functional geometry parameters, and symultaneously introduce dynamics into the conservative form of an archetypal wooden chair with armrests.

BASE	solid wood + oil, lacquer or colour lacquer

Echo

modular sofa

DESIGN: GRUPA, 2021

The **Echo** modular sofa provides an exceptionally relaxing experience of lying on the most comfortable bed. This sumptuous quality of comfort extends to the overall design of the sofa, and is especially accentuated in its seating cushion. The sofa is suitable for informal sitting and lying down, as the backrest and armrest are ergonomically adapted for relaxed reclining. Echo is also available in regular seating depth modules and can be used in the business premises. The whole system is supremely modular as it allows diverse combinations in terms of length and width. Echo comes in textile or in combination with leather on the outer sides of the backrest and armrests.

STRUCTURE	metal frame, solid wood, plywood
SUSPENSION	GOODSIDE® slats
BASE	steel rod ø16 mm, steel plate + powder coating

SEAT	HR foam
BACKREST	injected moulded foam, polyester wadding
UPHOLSTERY	fabric (removable) / fabric + leather (removable) / leather

Echo

modular sofa

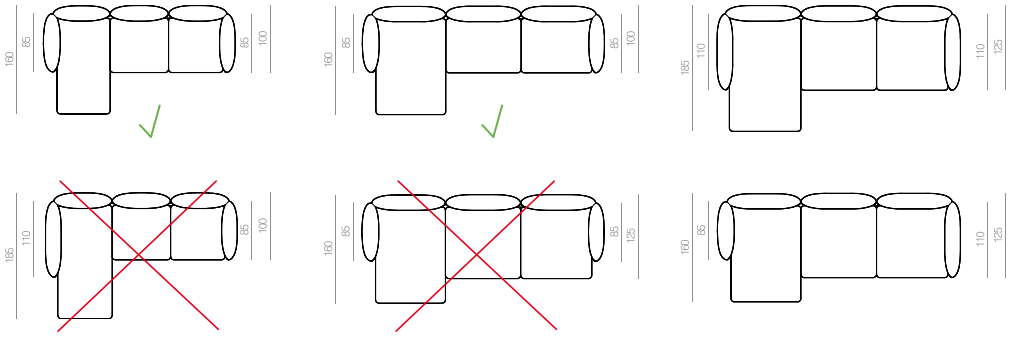
NOTE

- WHEN ASSEMBLING THE COMPOSITIONS WITH AN EXTENDED PART, THE DIRECTION OF THE FABRIC ON THE EXTENDED PART HAS TO FOLLOW THE LONGER SIDE, SO THAT IT IS ROTATED BY 90 DEGREES IN RELATION TO THE REST OF THE SET.



- WITH MODULAR SETS, IT IS NOT POSSIBLE TO COMBINE DIFFERENT MODULE WIDTHS, TYPES OF FABRIC OR COLOURS OF THE FABRIC ON THE SAME SET. WHEN ASSEMBLING COMPOSITIONS, ADJUST THE DEPTHS OF THE ARMRESTS TO FOLLOW A SINGLE ARMREST LENGTH IN THE SAME DIRECTION. WHEN SELECTING, TAKE INTO ACCOUNT THE DEPTH OF THE MODULE, WITH THE EXCEPTION OF THE EXTENDED PART WHERE THE PRIMARY CHOICE DEPENDS ON THE LENGTH OF THE ARMREST.

NOTE

- WHEN ASSEMBLING LARGER COMPOSITIONS, CHOOSE LARGER MODULES (E.G. A THREE-SEATER OR TWO-SEATER WITH A FOUR-LEGGED METAL CONSTRUCTION) TO AVOID UNNECESSARY LEGS ON THE FINISHED SET.

Elegance
sofa

DESIGN: PROSTORIA DESIGN TEAM, 2011

Elegance sofa is a perfect combination of comfort and reduced volume in a sophisticated way. Its clear lines are softened with rounded wide seat cushions which can be feather-filled for additional comfort.

STRUCTURE	solid wood, plywood
SUSPENSION	wave springs
SEAT & BACKREST	HR foam, polyester wadding / feather

BASE	lacquered wood / powder coated or polished metal
UPHOLSTERY	fabric / leather (removable)
LUX	model with feather filling

Fade

sofa bed

DESIGN: NUMEN/FOR USE, 2018

Fade is a sofa bed system featuring a characteristic, continuous diagonal bevel of edges, applied on all of the elements of the system. This formal fade-out of volumes, varying in depth or height, results in a soft transition of elements, uniting the cuboids of the seat, backrest and armrests.

STRUCTURE	solid wood, plywood
SUSPENSION	wave springs, elastic webbing
SEAT & BACKREST	HR foam, polyester wadding
UPHOLSTERY	fabric (removable)
MATTRESS	HR foam

MANDATORY TO SPECIFY

- **upholstery** *i.e. 166 HALLINGDAL 65 500*

Frame
shelves

DESIGN: SANJA KNEZOVIĆ, 2019

As a basis for creation of new and utilititarian mini volumes, served basic cubi, whose sides are framed with four-sided metal frames. Six basic models of **Frames Shelves** were created in this simple way, which could thus funcionally divide or unite the space. Or they could simply serve as a shelf next to a wall of a living room or an anteroom. Into these basic volumes can there be then set drawers made from massive wood as further subdivisional and sub-funcitional units. The wooden drawers can also create interesting play of materials in contrast to metal frames and become a special and defining units of every model.

Frameless

low tables

DESIGN: SANJA KNEZOVIĆ, 2020

Frameless is a member of the Frame collection of low tables. The only difference lies in the thickness of the metal construction. As the name suggests, Frameless has an extremely thin construction that results in a very refined appearance. It can function individually or in a group of low tables. This collection of low tables can be positioned either next to a sitting set or as a table for convenient storage of various items. Frameless contributes to different ways in which space can be used and to the atmosphere of the ambience. It can be as a discreet object or to accentuate a particular space. Surface with a core made of compact is inserted into a thin metal frame.

Impression

modular sofa

DESIGN: MEIKE HARDE, 2018

Impression sofa series incorporates elegance and comfort. Low and slim armrests and the backrest shape a gentle impression with curved inner parts for comfortable seating. Filigree but strong legs emphasize a fresh look. Delicate appearance is combined with a special detail on the armrests. An impression on each corner is repeated also on added cushions. The sofa comes also with open end modules, so it can be combined in various compositions.

STRUCTURE	plywood, metal	BASE	metal + powder coating

Jugo

OUTDOOR

DESIGN: NUMEN/FOR USE, 2021

The **Jugo** outdoor collection is reminiscent of the Mediterranean laid-back spirit evoking the need for hedonism. The collection is designed to contrast the rational and almost ascetic powder coated construction made of stainless steel to the oversized wooden armrests and lavish cushions.

STRUCTURE	stainless steel tube ø16 mm + powder coating (3seater) / stainless steel tube ø25 mm + stainless steel plate + powder coating (tables)
BASE	stainless steel tube ø16 mm + powder coating
ARMREST	solid wood + outdoor oil

SEAT & BACKREST	stainless steel plate + powder coating
CUSHIONS	waterproof fabric (removable)
TABLE TOP	stainless steel slats + powder coating / solid wood slats + outdoor oil

modular sofa

DESIGN: NUMEN/FOR USE, 2021

Klaster is a flexible modular system made up of minimalist cubes. It consists of 14 modules: 6 seats, 4 sofas and 4 backrests which can be freely combined into any number of exciting configurations. The visual identity of the modules aims for a certain degree of neutrality, thereby enabling maximum creativity when it comes to their arrangement and use. The sofa and the seating module can be put together to form a bed. Thanks to the variety of the modules and their multifunctionality, Klaster is equally at home in both domestic interior and public space.

STRUCTURE	plywood, metal, solid wood	BASE	metal + powder coating BLACK
SUSPENSION	GOODSIDE® slats, elastic webbing	ARMREST	plywood, veneer+ lacquer or black lacquer
SEAT & BACKREST	HR foam, polyester wadding	UPHOLSTERY	fabric (removable)

Knif
shelving system

DESIGN: STUDIO RU:T, 2021

Knif is a modular shelving system which caters for customized solutions and diverse user needs in various concepts of interior design. Composed of the metal construction and solid wood shelves, the system provides numerous combinations of heights and widths that can be upgraded over time. With visually light and low-key appearance, this sturdy structure sets the stage to the user's content. Quite spacious shelf's depth provides for exhibiting objects of diverse nature. Knif's minimalistic flair makes it compatible with other interior elements while preserving its own character.

SHELVES	oak solid wood + oil, lacquer or BLACK lacquer

Kontrapunkt

recliner

DESIGN: NEISAKO, 2020

The design of the **Kontrapunkt** armchair and chaise lounge transformer explores the possibility of creating lounge into one compact visually light object. This was achieved by using the armrests as part of an innovative mechanism that holds the leg pad extension and tilts the backrest into the proper position. Comfort is achieved through an ergonomic shape and material elasticity, particularly through different versions of the product's skin, upholstered in fabric or leather. The change of skins transforms its character, making it suitable for various situations of interior use. The ultimate experience of comfort can be additionally moderated through layers of feather and with the regulation of the height of the head cushion.

BASE	stainless steel or steel tube ø25 mm + polished/ powder coating
SUSPENSION	elastic webbing
SEAT & BACKREST	feather + polyester wadding

UPHOLSTERY BASE	leather, fabric
UPHOLSTERY FOOTREST AND ARMREST	leather
UPHOLSTERY CUSHIONS	leather, fabric

Layout
modular sofa

DESIGN: NUMEN/FOR USE, 2020

Layout was designed as a modular crossover between architecture and design. Its pragmatic design brings the ultimate comfort of a home sofa into an office environment, hotel lobby or airport lounge, offering a cocoon of privacy. This concept provides a solution for your entire interior design project based solely on four basic elements - the seater with backrest, two corners and a pouf.

STRUCTURE	solid wood, plywood
SEAT & BACKREST	HR foam, polyester wadding

BASE	PVC / metal platform black height 8, 12 cm + powder coating
UPHOLSTERY	fabric

Match L

modular sofa

83/103

DESIGN: SANJA KNEZOVIĆ, 2012

Match comes from a family of modular sofas, offering a large number of compositions, each adapted to a given space. Its morphology is defined by simple basic lines of a slightly lower armchair and an elevated armrest. While the cold foam fills its clear volume with firmness sufficient for comfortable seating, coating in fabrics of natural origin provides additional relaxation and comfort. Match's dimensions go hand-in-hand with the needs of different groups of users who are able to chose between two widths and depths of the module. Due to its morphology, Match is ideal for furnishing larger spaces.

STRUCTURE	solid wood, plywood
SUSPENSION	GOODSIDE® slats
SEAT & BACKREST	HR foam, polyester wadding

BASE	PVC
UPHOLSTERY	fabric (removable)

Match XL

modular sofa

83/103

DESIGN: SANJA KNEZOVIĆ, 2012

Match comes from a family of modular sofas, offering a large number of compositions each adapted to a given space. Its morphology is defined by simple basic lines of a slightly lower armchair and an elevated armrest. While the cold foam fills its clear volume with firmness sufficient for comfortable seating, coating in fabrics of natural origin provides additional relaxation and comfort. Match's dimensions go hand-in-hand with the needs of different groups of users, who can chose between two different widths and depths of the module. Due to its morphology, Match is ideal for furnishing larger spaces.

Monk

easy chairs

DESIGN: GRUPA, 2014

Monk easy chair's shell is made of two bent plywood plates upholstered in fabric underneath which lies a simple wooden structure of massive oak or walnut. The armrest makes the part of the seat and the whole shell visually appears as floating independently from its relatively inconspicuous support, thus paying homage to the retro furniture and the play between typologies. Monk is available in two versions - as a chair and an easy chair. Together, the two Monks unite everyday functions of work and contemplation.

SHELL	plywood, HR foam, polyester wadding
BASE	solid wood + oil or lacquer / metal tube ø16 mm + powder coating
UPHOLSTERY	fabric

MANDATORY TO SPECIFY

Monk

chairs with swivel base

DESIGN: GRUPA, 2021

The **Monk** collection has a new addition - a chair with a swivel base that comes either fixed or with castors. The upholstered seat and backrest provide greater comfort, making this chair ideal for long working hours. The shell of the chair is made of two bent plywood planks upholstered with fabric. The armrest forms part of the seat, and the whole shell visually appears as if it is hovering independently of the support.

SHELL	plywood, HR foam, polyester wadding
BASE	metal tube ø16 mm + powder coating
UPHOLSTERY	fabric

MANDATORY TO SPECIFY

Monk
barstools

DESIGN: GRUPA, 2016

Monk barstool is a new member of the Monk collection, consisting of chairs, easy chair, tables and low tables. Its form has been derived from the metal structure typology that has been added to the collection as an alternative to wooden legs. The seat is made of bent plywood, like in chairs and armchairs, upholstered in fabric or leather. The metal structure of sled base, circles around the back of the seat, forming the backrest.

Oblikant

chairs

DESIGN: NUMEN/FOR USE, 2018

Oblikant chair is a derivation of the Oblique family. Regardless of the difference in technology and typology from its upholstered siblings, it retains the characteristic S-shaped profile. Strong curvature of the shell provides good ergonomics which is further highlighted by the elasticity obtained from this geometry. The shell is combined with 6 versions of steel legs are stackable, and one solid wood base.

Oblique
easy chairs

DESIGN: NUMEN/FOR USE, 2014 (REDESIGN 2016)

Two triangular prisms define a characteristic profile of the **Oblique** easy chair supporting the maximum foam thickness on the rear of the seat and the backseat's lumbar area. The metal construction is bent to follow a specific geometry and upholstered with cast foam, resulting in a unique pulsating form. The Oblique easy chair is available in two versions: with the leg base made of solid wood or metal.

Oblique

chairs

INDOOR

DESIGN: NUMEN/FOR USE, 2014

The basis of the **Oblique** system is the characteristic profile of a chair which, defined by two triangular prisms, ensures maximum foam thickness on the back side of the seat and the backrest's lumbar area. The metal is bent at a specified geometry and is upholstered with the moulded foam, resulting in a unified pulsating form. As a result of the triangulation, the solid wood legs thin towards the bottom, thus transforming the square cross-section of the top of the legs into their bases' triangle.

Oblique
tables

DESIGN: NUMEN/FOR USE, 2014

Oblique collection is completed with the table which can be used in the office or as a dining table. The character of the complete collection has been best expressed in this table. Specific geometry of the legs made of solid wood in combination with the floating table topmakes a perfect match.

TABLE TOP	MDF + FENIX NTM
LEGS	solid wood + oil, lacquer or black lacquer

Oblique

low tables

DESIGN: NUMEN/FOR USE, 2014

Oblique low tables come in three sizes. Legs are produced from the solid wood and protected with high-quality oil or lacquer. As a result of the triangulation, the solid wood legs thin towards the bottom, giving them elegant flair and making them an ideal addition to Oblique easy chair.

TABLE TOP	solid wood + oil or lacquer, black lacquer / MDF + FENIX NTM

Omnia
collection

DESIGN: NEISAKO, 2023

The archetypal silhouettes of the **Omnia** armchair are gently reinforced by refined transitional shapes. Concrete and clear geodesics of constructive membrane from the outside turn from convex to concave, hence supporting ergonomic line that harmoniously embrace the volumes of backrest and armrests. Upholstered elements are rich in dimensions and together with specially designed substructures enable cosy and long sitting sessions in many positions. Omnia is, thanks to its elegant silhouette and comfortable character, convenient for both formal and informal interior settings. Additional connector/sideboard element and rectangular arrangement provide possibilities for spatial setups in which by connecting the armchairs is possible to create a free-form floor plan in raster-like formation, which then provides the freedom to change the orientation in desired direction.

SEAT	HR foam, polyester wadding
BACKREST AND ARMREST	HR foam, polyester wadding
CONSTRUCTION	powder coated steel / sand-grinded stainless steel
SUPPORT	elastic webbing

UHPOLSTERY FOR SEAT AND BACKREST	fabric (non-removable)

Osmo

easy chairs

OUTDOOR

DESIGN: NUMEN/FOR USE, 2016 & 2019

Osmo series has been developed in line with the classic typology of catering chairs for hotel and restaurant terraces. The inox construction with a wooden seat and back provides the optimal ratio of robustness and comfort necessary for the extensive use in an exterior exposed to the sun and salty air. The bent tube construction defines the frame in which the seat and backrest made of profiled wooden slats are inserted. The characteristic angle of the front legs of the chairs combined with the extremely wide, "fractured" armrests results in a biomorphic appearance of an insectoid robot from SF films.

SEAT & BACKREST	inox plate + powder coating / solid wood + outdoor oil
BASE	inox tube ø16 mm + powder coating
ARMRESTS	solid wood + outdoor oil
CUSHIONS	waterproof fabric (removable)

MANDATORY TO SPECIFY

- **type of the easy chair** *i.e. easy chair with wood*
- **metal finishing** *i.e. BLACK*
- **wood finishing, when specified** *i.e. TEAK*

Pil-low

sofa bed

DESIGN: NEISAKO, 2013

Pil-low is a multifunctional sofa characterized by specific relationship between the seat, backseat and cushion in which the cushion has a double function – in the sofa position it improves the seating ergonomics and in the bed position it serves to enlarge the sleeping space. The usual decorative cushions used for improving seating ergonomics are no longer required. The innovative mechanism enables simple transformation from sofa to bed. In the first stage of opening the storage space becomes available, otherwise completely hidden in the sofa position. The form of the sofa has been designed as a complete spatial object and functions equally well freestanding or standing next to the wall.

Polygon

easy chair

INDOOR & OUTDOOR

DESIGN: NUMEN/FOR USE, 2013 (REDESIGN 2016)

Polygon is an easy chair with armrests based on modernistic typology of the seat with modest dimensions which fulfils functional parameters but does not usurp the space with its volume and immobility. The triangles, which define the orthogonal side view on the armchair, transform into hexagons and more complex polygons when the perspective changes. The resulting product seems familiar, or even old-fashined, yet extremely contemporary. The construction made of bent steel profiles additionally highlights Polygon's dual character.

SEAT & BACKREST	moulded foam, metal frame, elastic belts

Polygon

low tables

INDOOR & OUTDOOR

DESIGN: NUMEN/FOR USE, 2014 (REDESIGN 2018)

Three **Polygon** tables are based upon the same formal origin as Polygon easy chair. The dominant triangular form is accentuated when viewed from the side, but once the observer begins to move, three triangles of the base overlap into complex three-dimensional drawings. The height and the surface of the top plates are counterpointed resulting in radically different inclinations of diagonal lines of the steel bars. Table tops can be made from solid wood, MDF with Fenix or HPL , making them suitable for outdoor use.

TABLE TOP	solid wood + oil or lacquer / MDF + FENIX NTM / outdoor HPL
BASE	metal rod ø12 mm + powder coating

MANDATORY TO SPECIFY

Rei

lounge collection

DESIGN: NUMEN/FOR USE, 2024

Designed to be an anchor of a room, **Rei** functions as a focal point, defining and grounding the space around it into a zone of personal ritual. With its flexible and contouring shell of moulded plywood, contrasted by the soft padding of differing heights and paired with a lounge ottoman, it keeps blurring the ever more fluid distinction of home vs. work or private vs. public. The swivel mechanism is added to maximise comfort and flexibility. An elegant, seamless fusion of free flow and formal restraint, which makes Rei chairs both iconic and egalitarian, aspirational and sober, is this collection's most defining quality.

Revolve
sofa bed

reddot design award winner 2012

Golden Key Award

DESIGN: NUMEN/FOR USE, IVANA BOROVNJAK, ROBERTA BRATOVIĆ, 2011

Revolve is a multifunctional sofa that merges seating and sleeping in an innovative way. Its design stands out in any interior, giving it a special character. By a simple rotation of 180 degrees, it can be transformed from a sofa into a bed. Revolve is a perfect bed for two thanks to the padding that is the same the one used for self-standing mattresses. Its dynamic form and dual function make it suitable for decorating a home, office or a holiday home.

Rhomb

chairs

DESIGN: SMPDO, 2016

Rhomb is a spacious, comfortable and solid chair with armrests, produced by combining the latest wood manufacturing technologies and sophisticated handcraft. Its character is defined by the rhomboid section that rotates and changes the shape depending on the function of the curve that unites the backrest and the armrest. Through selection of several types, colours and solid wood finishes, Rhomb easily adapts to various interiors, either residential or public.

Rhomb
tables

DESIGN: SMPDO, 2016

To match the chair, Simon Morasi Piperčić designed **Rhomb** table with the legs shaped as rhomboids. They are positioned diagonally in the direction of the corners of the table. Viewed from an angle, two legs are very thin and the other two are wide, giving the table an interesting and dynamic look. The table top has a lens like form and sharp knife edge, resulting in a very elegant. Especially when the table is made in lacquered finish with Fenix top.

TABLE TOP	solid wood + oil or lacquer / MDF + FENIX NTM
LEGS	solid wood + oil, lacquer or colour lacquer

Rhomb

conference tables

DESIGN: SMPDO, 2021

The **Rhomb conference table** is part of the collection of the same name with characteristic rhomboid-shaped legs positioned diagonally to the corners of the table. Thanks to its dimensions, it is suitable for holding meetings for a larger number of people (10-14) or for working with a larger number of people at the same table. The openings on the surface of the table provide additional functionality for the installation of power modules and routing cables. The table top has rounded corners and sharply cut edges, which results in a sophisticated appearance, especially when the table is made in lacquered finish with a Fenix top.

TABLE TOP	MDF + FENIX NTM

MODULES

DESIGN: BENJAMIN HUBERT | LAYER, 2022

Rostrum is an infinitely scalable sofa system with a highly sophisticated design language that takes its name from a raised performance platform – a nod to the slender legs that raise the modular seating elements and accessories above the floor. This elevated structure gracefully cradles the soft cushioning and reduces the visual weight of the sofa system. It also allows for the use of a minimal, lightweight, frame system that acts as a signature element across a range of CMF expressions, with the ability to mix and match materials, colours, and finishes. The intuitive functionality of the accessories – such as the simple swivel of the height adjustable table – complements the architectural forms. These linear forms are further emphasized by the ribbed detail of the dividing screens, which echoes the slender legs; while power is integrated seamlessly into the frame structure.

STRUCTURE	metal frame, solid wood, plywood	BASE	steel construction + powder coating / ALU legs + powder coating
SUSPENSION	elastic webbing	UPHOLSTERY	fabric (removable)
SEAT & BACKREST	HR foam, polyester wadding	SIDE TABLE	solid wood + oil or lacquer / FENIX

INSTRUCTIONS FOR USING THE PRICE LIST:

Rostrum is a modular system offering numerous possibilities of combining components. To provide an easy-to-use Price List, we have defined the most frequent basic and characteristic compositions by the description and price that can be used for a quicker calculation of the price.
In case you need a price of the composition which compared to the one shown differs only in one element, deduct its unit price from the composition and add the price of the element that you need.
When combining the components, use the typology for a better insight in the required dimensions of the structure and elements.

MANDATORY TO SPECIFY

- **number of the composition or type of modules/legs/bases specification and dimensions**
- **metal finishing** *i.e. BLACK*
- **side table** *i.e. OAK nature*
- **upholstery** *i.e. 113 STEELCUT TRIO 3 500*
- **sketch of the configuration**
- **if ordering power socket please specify position (E1 or E2)**

LOW TABLE IS ONLY AVAILABLE IN SOLID OAK OR FENIX

POWER SOCKET
w 16 × d 9 × 6 cm
w 16 × d 9 × h 6 cm

343

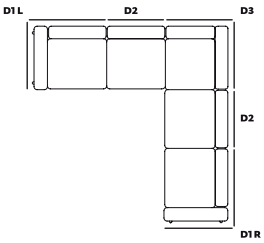
w - width / d - depth / h - height

All prices are in EUR

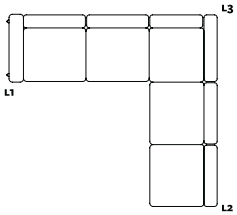
NOTE

- INSTEAD OF A SEAT + BACKREST MODULE, YOU CAN ORDER A 76 × 70 CM TABLE TOP OR DEEP SEAT AND VICE VERSA **(M)**
- SHELF ON HIGH LEGS IS A POSSIBLE ADDITION ONLY IF COMPOSITION ENDS WITH AN ARMREST **(A)**
- AN ARMREST CANNOT BE IN THE MIDDLE OF THE COMPOSITION
- EACH COMPOSITION CAN HAVE ADDITIONAL POWER SOCKETS AT PRECISELY DEFINED POSITIONS
- THE POSITION OF THE SOCKET MODULE IS ALWAYS BETWEEN TWO SEATS (OR POUFS), IN LARGER COMPOSITIONS AT PRECISELY DEFINED POSITIONS. THERE CAN BE NO SOCKET MODULE ON A POUF AND ALL SINGLE-SEAT SOFAS
- BACKREST CAN HAVE A FRONT OR REAR POSITION (FOR 2 DIRECTION SEATING)
- D2 CAN ONLY BE ORDERED IN COMBINATION WITH D1 OR D3. IT CANNOT STAND ALONE.
- POWER SOCKETS CAN BE ORDERED IN BLACK OR LIGHT GREY. THEREFORE CONSTRUCTIONS FOR COMPOSITIONS WITH POWER SOCKETS ARE ALSO AVAILABLE IN BLACK OR LIGHT GREY
- WHEN ORDERED INSIDE A COMPOSITION, MODULES 1SEATER AND POUF WILL BE MARKED AS EITHER LEFT OR RIGHT, DEPENDING ON THE COMPOSITION
- A DIVIDER CAN BE CONFIGURED IN THE FOLLOWING COMBINATIONS:

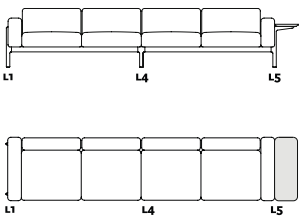
- *POSITIONS OF DIVIDERS*



- *POSITIONS OF LEGS (CORNER CONNECTION)*



- *POSITIONS OF LEGS (LINEAR CONNECTION)*



- WE RECOMMEND USING LACQUERED WOOD FINISH FOR THE EASIER MAINTENANCE

Sabot
modular sofa

MODULES

DESIGN: BENJAMIN HUBERT | LAYER, 2022

Sabot is a playful arrangement of abstract volumes supported by characterful wooden legs that celebrate Prostoria's woodworking ability. The modular sofa system takes its name from a type of simple clog – a nod to those wooden feet. The soft and approachable design language is inspired by residential interiors, and brings a strong playful identity to commercial spaces.

STRUCTURE	moulded foam, solid wood, plywood
SUSPENSION	elastic webbing
SEAT & BACKREST	injected moulded foam
BASE	powder coated BLACK construction covered with oak solid wood

LOW TABLE	solid oak wood + oil or lacquer
PLANTER	PP (POLYPROPILENE) available in LIGHT GREY ≈ RAL 7047 DARK GREY ≈ RAL 7015
PLANTER TOP	solid wood / MDF FENIX
UPHOLSTERY	fabric (removable)

E1 E2 - POSSIBLE POWER SOCKET POSITION

Seam

modular sofa

DESIGN: BÖTTCHER & KAYSER, 2014

Seam is characterized by a unifying line which goes all over and draws the sofa's shape. The visible seams, analogous to leaf veins, define its organic structure. The straight external outlines come in contradiction with the softness of the padded seat, armrests and backrest. The thin feet, made of square section bended bar follow on from the seams, and bring lightness. Seam is a unique system when it comes to its inclination cuts on all sides. It makes it more welcoming just like its shape.

STRUCTURE	plywood, metal frame
SUSPENSION	elastic webbing
SEAT & BACKREST	HR foam, polyester wadding

BASE	metal + powder coating
UPHOLSTERY	fabric / leather

MANDATORY TO SPECIFY

- **modules specification and dimensions**
- **metal finishing** *i.e. BLACK*

Segment
modular sofa

MODULES

DESIGN: NUMEN/FOR USE, 2013

Segment is a modular system available as a multi-base set of elements that can be combined to create a variety of functional yet unconventional compositions. Segment's identity stems from the form of its main element with a characteristic basic double-sided slopes at the ends at an angle of 45 degrees that results in excellent ergonomics.

STRUCTURE	metal frame	BASE	steel construction + powder coating
SUSPENSION	elastic belts	TABLE TOPS	solid wood + oil or lacquer / FENIX
SEAT & BACKREST	injected moulded foam	UPHOLSTERY	fabric / leather

INSTRUCTIONS FOR USING PRICE LIST:

Segment is a modular system which offers numerous combinations of components. For easier use of the Price List, we have defined the most frequent basic and characteristic compositions that can be used for a quicker calculation of the price. Legs and connectors are included in prices. For unlisted compositions, please send us an inquiry.

Separe

modular space-dividing system

DESIGN: SMPDO

Separe is a sound-absorbing and space-dividing system that allowing for the creation of diverse spaces for meeting, close collaboration, privacy, and focusing. It is a modular system that brings structure to open-plan layouts and interaction processes happening in them. The system is ideal for shared spaces such as lounge areas, waiting rooms, libraries, coworking spaces, and workplaces. Separe is lightweight and freestanding, suited to build a wide range of configurations, and ready to adapt quickly to changing conditions and preferences.

STRUCTURE	metal frame, airfelt – recycled acoustic felt
CONNECTING PROFILE	solid wood + oil, lacquer or color lacquer
UPHOLSTERY	fabric
HOOK	powder coated steel

MANDATORY TO SPECIFY

- **number of modules**
- **upholstery** *i.e. ARCO JADE 400*
- **wood finishing** *i.e. BLACK lacquer*
- **metal hook finishing** *i.e. BLACK*

Shtef

shelving system

DESIGN: 3LHD & GRUPA, 2018

Shtef's basic structural module is a square that is applied on the wall as a visually autonomous object. However, to make the system adaptable to various ambiences and intended purposes, several modules with different proportions have been developed as well as free-standing variants. L-cross-section shelves are inserted in the structural module. Shelf is made from aluminium to achieve lightweightness.

- FRAME 02 AND 05 CANNOT BE MOUNTED ON THE WALL ON THEIR OWN; THEY MUST BE ON THEIR FEET OR PART OF A LARGER COMPOSITION
- ALL FREESTANDING COMPOSITIONS (E.G. 15, 16) HAVE LEGS B
- ON ALL FREESTANDING COMPOSITIONS (E.G. 15, 16) FIRST OR LOWEST SHELF MUST BE AT LEAST 27.5 CM DEEP; DO NOT USE SHELVES 01 FOR THAT POSITION

Simetria

coat stand

DESIGN: NEISAKO, 2014

The name of the coat stand **Simetria** reflects its symmetrical form resulting from the rotation and mirroring of the same linear support. This principle enables rationalisation of material consumption while the easy disassembly of the construction makes additional convenience which simplifies the construction and transport in the "flat pack" form. The lesion between straight lines on the juxtaposed pyramids changes depending on the viewing angle - from a static and symmetric vision into a dynamic and vibrating form.

STRUCTURE	solid wood + oil, lacquer or BLACK lacquer

MANDATORY TO SPECIFY

- **wood finishing** *i.e. OAK nature LACQUER*

COAT STAND

w 54 × d 54 × h 180 cm

ARMRESTS

DESIGN: ALTHERR DÉSILE PARK, 2023

Spectrum collection esthetic reflects a combination of simplicity with complexity. More than a sofa, it is a system of expressive components that builds around foundational core of seat, backrest, and cushions. A base like the perfect white shirt – lightweight, timeless – and further enriched with carefully crafted design details like stiches and colors that make it special. Easy to configure so as to dress up/dress down.

SUSPENSION	elastic webbing
BASE	metal + powder coating
LEGS	metal + powder coating / solid wood + lacquer or BLACK lacquer

BACKREST	HR foam, polyester wadding
SUPPORT CUSHION	feather, foam
SEAT CUSHION	HR foam, polyester wadding
UPHOLSTERY	fabric / leather (removable)

Strain

easy chair

reddot award 2015 winner

DESIGN: SMPDO, 2014

Despite its visual lightness, **Strain** provides that is usually expected from large dimension sofas thanks to its seat with elastic band support, stretched backrest shell and free lumbar cushion, which facilitates various sitting possibilities. The seat cushion and the backrest shell tailored from a twodimensional plate - are set on a complex metal structure, and the form is achieved after when it is stretched from the top of the structure to the bottom of the seat.

Strain

low chair

DESIGN: SMPDO, 2020

Strain low chair is a hybrid between a chair and an armchair. It was designed as a chair that can easily blend in smaller interiors but simultaneously provide comfort of an armchair. The Strain low chair can be combined with or without a functional armrest that follows that main idea. With intertwined leg junctions providing the required firm construction, this low chair follows the main characteristic of the whole Strain collection. To obtain additional comfort, the seat can be upholstered in textile.

Strain
barstools

DESIGN: SMPDO, 2016

The character of this barstool is obtained with an indented form of the seat and interweaving of tube legs, as the main signature of the whole **Strain** collection. The ergonomically shaped seat, inspired by a saddle, provides various ways of dynamic seating and is made from solid wood finished with natural oil. The principle of interweaving steel tube legs, creates a footrest and a seat holder and footrest, solidifies the construction. The barstool is available in 3 heights and adaptable to all situations in either residential or public facilities.

SEAT	solid wood + oil, lacquer or black lacquer
BASE	metal tube ø20 mm + powder coating

Strain

tables

INDOOR & OUTDOOR

DESIGN: SMPDO, 2016

The latest addition to the collection comes as a line of tables with the typical **Strain** base. Interweaving steel tubes make an elegant base to a thin looking table top. The table comes in various sizes and can be combined with different types of chairs.

TABLE TOP	MDF + FENIX NTM / outdoor HPL
BASE	metal tube ø22 mm / ø25 mm + powder coating

MANDATORY TO SPECIFY

Strain

low tables

INDOOR & OUTDOOR

DESIGN: SMPDO, 2014

Strain low tables are an ideal addition to the easy chair, as they complement the chair's identity both functionally and aesthetically with their lightness and simplicity. They come in two different sizes, with table top in 5 colors in Fenix or 3 colours in the outdoor version HPL , and legs in the same finish as the easy chair's legs.

TABLE TOP	MDF + FENIX NTM / outdoor HPL or aluminium 5 mm powder coated

NOTE

- FOR OUTDOOR METAL TABLES, POWER COATING FOR BASE AND TOP IS ALWAYS IN THE SAME COLOUR

Tinker
easy chair

DESIGN: GRUPA, 2020

Designed to be inviting, **Tinker** is conducive to comfortable sitting and relaxed work by a mid-high table. Its form highlights the plywood backrest and the seat shell, upholstered in fabrics. In terms of typology, Tinker lies between a chair and easy chair. Therefore, the seating cushion is intentionally softer, accentuating the feeling of cosiness and luxury, also achieved through its overall ergonomics. The slim steel legs keep the base "afloat", and they are available in diverse coating finishes.

SHELL	plywood, veneer + lacquer
BACKREST	HR foam, polyester wadding
SEAT	HR foam, PES filling, polyester wadding
BASE	metal rod ø16 mm + powder coating BLACK
UPHOLSTERY	fabric

Tinker

low table

DESIGN: GRUPA, 2021

The **Tinker** low table is designed in line with the details on the metal construction of the armchair from the same collection. It is a system of elegant low tables of different heights that can be used individually or in a group, complementing each other. When clustered, Tinker low tables can be applied in multiple and diverse ways in a variety of interiors. Tinker low tables are constructed from various table tops available in smoked glass and solid wood laid on a metal structure.

TABLE TOP	solid wood + oil, lacquer or black lacquer / smoked glass
BASE	metal rod ø14 mm + powder coating BLACK

MANDATORY TO SPECIFY

- **dimensions of the low table**
- **table top** *i.e. OAK nature*

- SOLID WOOD TABLE TOPS ARE NOT AVAILABLE IN OTHER COLOUR LACQUERS
- WE RECOMMEND USING LACQUERED WOOD FINISH FOR AN EASIER MAINTENANCE

Toggle
easy chairs

DESIGN: NUMEN/FOR USE, 2020

Toggle is an unpretentious armchair of small dimensions whose character entirely rests on the star-shaped composition of its profile. The three basic radial triangles of its structure extend into its front legs and the armrest, providing an aesthetic and static balance to the chair. The removable cushions attach to the wooden base with strip-shaped gussets connected by a cylindrical plug, the Toggle. Depending on the treatment of the wood and the selection between the wooden or steel front legs, the armchair changes its appearance, adapting to its surroundings and purpose.

SEAT & BACKREST	HR foam, polyester wadding
BASE	solid wood oak + oil or lacquer / metal tube ø12 mm + powder coating

ARMRESTS	solid wood oak + oil or lacquer

Trifidae

armchairs & pouf

DESIGN: NUMEN/FOR USE, 2017

Trifidæ are a family of seats consisting of different armchairs - the easy chair, conferenece chair, armchair and the enclosing lounge chair share the same triangulated form with the focal point in the central part, embracing the user's lumbar area and functioning as an armrest. Application of the enclosing backrest provides an introverted, expressive chair, protecting it's user from surrounding, while the use of the slim, high backrest ends up in an open, extrovert personality and usage of the chair.

STRUCTURE	moulded foam, metal frame

Trifidae

tables & low tables

INDOOR & OUTDOOR

DESIGN: NUMEN/FOR USE, 2018

Table series is developed from **Trifidae** base characterized by the transformation of transaction of the prongs, starting from vertical rectangle at the center gradually turning into the horizontal one at its end. Various sizes and heights of the plates provide a wide range of functions and appearances. The base is made from cast aluminium and the table tops are produced from solid wood, lacquered MDF or HPL, suitable for the outdoor use.

TABLE TOP	solid wood + oil or lacquer / MDF + FENIX NTM / outdoor HPL

Umomoku

INDOOR & OUTDOOR

DESIGN: 3LHD, 2018

Umomoku is an unobtrusive and simply designed line of comfortable outdoor furniture intended for lounging. The furniture construction consists of broad and narrow wooden slats of a square cross section that create a recognizable graphism in the design. Rich, sumptuous cushions create the visual identity of the entire collection. Modular nature of the Umomoku collection allows the users to combine multiple elements according to their needs, but also their individual use, both in the exterior and interior. It consists of an armchair, sofa, low table, bench, sunlounger and a tray.

STRUCTURE	solid wood + oil or lacquer / outdoor oil

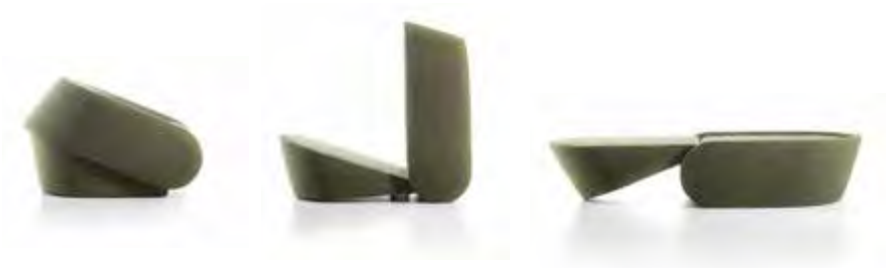
Up-lift

sofa bed



DESIGN: NEISAKO, 2013

Up-lift represents innovation in the segment of the armchair typology with an integrated bed. Its shape allows for transformation through the simple lift (UP) of the back rest, which automatically lifts (LIFT) the bottom part of the bed, while maintaining an optimal height. Its form consists of the two volumes, which by the eccentric principle rotate around each other, thus forming a harmonious unit in both positions. The armrest is rounded as it took over the function of the wheel, and the backrest is tilted and rounded to minimise the necessary volume. Up-lift has a distinctive character due to its roundness.

STRUCTURE	solid wood, plywood
SUSPENSION	elastic webbing
SEAT & BACKREST	HR foam, polyester wadding

V bags

accessories

MADE FROM
RECYCLED
MATERIALS

The **V bag** is born of our idea that we need a beautiful, functional product, with a strong emotional impact, made exclusively from the material left unused in production, due to the inherent impossibility of fully utilising the fabric during tailoring process.
The design of the V bag is very minimalist and mostly dominated by durable fabrics characteristic for special and attractive weaving structures and patterns and tactile experience. Taking into account that we are using leftover textiles from Prostoria's collections procured from the best manufacturers of furniture fabrics, we will keep continuously producing limited editions of the V bag in various fabrics. The V bag is a universal fashion accessory that fits all occasions - it can be used as a day bag, or a bag for groceries, training or beach, or wrapped around the body.

V BAG

MINIMUM ORDER 5 PCS

All prices are in EUR

NOTES

- V BAGS CAN ONLY BE ORDERED IN PACKAGES OF 5 ITEMS EACH. YOU CAN CHOOSE YOUR PACKAGE BASED ON AN ACHROMATIC, WARM OR COLD COLOR PALETTE, AS SHOWN IN ILLUSTRATIONS BELOW:

ACHROMATIC PALETTE

WARM PALETTE

COLD PALETTE

THESE ILLUSTRATIONS DON'T SHOW THE EXACT FABRICS, THEY ARE AN INDICATION OF COLOUR PALLETTES

- SINCE V BAGS ARE MADE OF RECYCLED LEFTOVER MATERIAL FROM FACTORY'S MAIN PRODUCTION LINE, THE FABRICS CANNOT BE CHOSEN FOR ANY SPECIFIC ORDER
